

# Pompeii Archaeological Research Project: Porta Stabia Excavation Records Finding-Aid

## Overview

**Accession Code:** EXV-PARP:PS

**Principal Creators:** Steven Ellis

**Title:** Pompeii Archaeological Research Project: Porta Stabia (PARP:PS) Excavation Records

**Principal Dates:** 2005-2012

**Principal Language:** English

**Scope and Content:** Between 2005 and 2012, Steven Ellis directed the Pompeii Archaeological Research Project: Porta Stabia under the auspices of the University of Cincinnati and the American Academy in Rome. Excavating a large sub-elite neighborhood in Regiones I and VIII of Pompeii, the goals of the project have been to reveal the structural and social relationships over time between Pompeian households of variable economic portfolios, to determine the role that sub-elites played in the shaping of Roman urban networks, and to register their response to city- and Mediterranean-wide historical, political, and economic developments. An additional and especially important aim has been to unravel the complex connections between urban infrastructure (especially waste management) and the making of long-lived, complex urban sites.

Series (and subseries) in the Pompeii Archaeological Research Project: Porta Stabia (PARP:PS) Excavation Records include: Excavation Records (Series I containing illustrative records) and Artifactual Materials (Series II containing faunal samples).

**Access:** The collection has been processed. Please contact the archivist for further information.
