COMMUNICATIONS

From the Editors

Nestor readers will notice a few changes in this first issue of 2006. Electronic publications and reviews are no longer listed in separate sections, but are incorporated among print publications of the same types. In addition, the catalogue numbers assigned to each bibliographic entry are now ten-digit codes, including a four- (rather than two-) digit annual prefix. Further alterations, some visible to subscribers and readers, are anticipated in order to streamline the production of the bibliography and the searchable database, and the editors of *Nestor* beg your patience as we modernize our operations.

Electronic News and Notices

The scope of Abzu, a guide to the study of the Ancient Near East on the Web at <http://www.etana.org/abzu/>, has recently been expanded to include Greece and the Aegean. New additions to Abzu can be found using the "View items recently added to ABZU" link on the home page, at which entries are listed for a month, or using the RSS feed from the same page, or at the blog constructed from the RSS feed at <http://www.bloglines.com/blog/AbzuNew>.

Digital copies of Kommos publications and archives, including the Kommos volumes published by Princeton University Press (except, at present, Vol. V) are available in downloadable PDF format at <https://tspace.library.utoronto.ca/handle/1807/3004>. This site currently contains a Bibliographical Guide to the Kommos site, sixteen articles and preliminary excavation reports, a conference volume and a monograph on a ceramic kiln. There is in addition an extensive catalogue of the Bronze Age pottery which accompanies ceramic studies in recently published Volume V (not yet scanned), which libraries are encouraged to print and shelve next to that volume, to be used as a supplement. It is anticipated that the excavation archives will be added, field records, including the trench notebooks and reports that now exist in paper form and on microfiche.

Obituaries

The editors of *Nestor* are saddened to report the death of Andrew Sherratt, Professor of Old World Prehistory at the University of Sheffield. Within the extensive scope of his analysis, Professor Sherratt's concept of the 'Secondary Products Revolution' and his application of world systems theory to Bronze Age Europe have been particularly influential in Aegean archaeology.

The editors of *Nestor* are saddened to report the death of Machteld Mellink, T. Leslie Clark Professor Emerita of Classical and Near Eastern Archaeology at Bryn Mawr College. In addition

to participating in excavations beginning at Tarsus and to directing projects in the plain of Elmalı including the excavation of Karataş-Semayük, Professor Mellink contributed the newsletter “Archaeology in Anatolia” to the *American Journal of Archaeology* for nearly four decades, and received the AIA Gold Medal for Distinguished Archaeological achievement among other honors.

Calls for Papers

On 30 June 2006 abstracts (150-200 words, including name, institution, and the title of the paper) are due for the **13th Neolithic Seminar: The Mesolithic and the Neolithic Cultural and Populational Trajectories in Eurasia**, to be held from 10-12 November 2006 at the Department of Archaeology, Ljubljana University, Ljubljana, Slovenia. This seminar aims to provide a forum for the discussion of Mesolithic and Neolithic cultural and population trajectories in Eurasia as they are reflected in the material culture, agency and power, settlement patterns and ritual landscapes, social structures, cognitive systems, and in human population genetic palimpsests. All previous Neolithic Seminar proceedings are available in the periodical *Documenta Prehistorica* XXI-XXXII.
