Call for Papers

On 30 May 2018 abstracts (300 words maximum) are due for an international workshop entitled **OIKOS: Archaeological approaches to House Societies in the ancient Aegean**, to be held on 6-7 December 2018 at the UCLouvain, Louvain-la-Neuve, organized by AEGIS. Abstracts may be submitted to maria.relaki@uclouvain.be or jan.driessen@uclouvain.be. Further information is available at <https://hcommons.org/deposits/item/hc:18579/>. Contributions are sought that discuss, embellish, and debate the usefulness of the House Society model in the context of the ancient Aegean in any of the following fields of investigation (although by no means limited to these areas)

- House membership. Approaches that consider the constitution of Houses from a number of perspectives including: kinship, funerary behavior, bioarchaeology, architecture/spatial patterning, gender dynamics, marriage patterns, population mobility.
- The role of Houses in political and economic organization. How might collective action, alliance, co-operation, and integration affect the organization of production, the allocation of resources; trade and exchange patterns; and administration?
- Material culture is a key component in the definition of Houses as social entities. Can the study of ancient technology and craft production be approached from a House Society perspective?
- Ritual and symbolic expressions of House identity; aspects of ancestor veneration, heirlooms; religion, cult.
- Diachronic perspectives: continuity and disruption in activities associated with Houses; conflict and violence; the configuration and transformation of territories; the shaping of physical and social landscapes.
- The value of ethnography and analogy, critical approaches to ethnoarchaeology.

Calls for Papers

On 30 September 2017 abstracts (300 words maximum) are due for the **12th International Workshop of the Association for Written Language and Literacy (AWLL12) Diversity of writing systems: embracing multiple perspectives**, to be held on 26-28 March 2019 at the Faculty of Classics, University of Cambridge. What linguistic and psychological processes are at work in the adaptation of one writing system to another? How are these affected by the cultural and social context of the adaptation?

What linguistic, psychological, cultural and social, and technological factors bring about diversity within writing systems? How do such factors influence literacy acquisition and shape the use of writing?

How can studying the development of historical writing systems enhance our understanding of contemporary writing systems? How can contemporary research on reading and writing contribute to the study of historical writing systems?

How are the world's writing systems likely to develop in the future? What principles should guide orthography development for as yet unwritten languages?
