COMMUNICATIONS

Calls for Papers

On 7 April titles and abstracts (up to 300 words) are due for participation in the **5η Αρχαιολογικοί Διάλογοι. 5th meeting of Dialogues in Archaeology**, to be held on 31 May-2 June 2019 in Volos; submissions should be sent by email to ad2019@uth.gr. Further information is available at <http://ad2019.uth.gr/el/home.php>. The central theme of the conference will be ThalassoGeographies: Sea Routes, Flows, Networks; themes will include:

- Population movements by sea, creation and development of migrant settlements through time, migrants' professional activities and their relations with the rest of the population diachronically.
- Commercial activities, sea routes and communications, diasporas, port areas and the related human communities.
- Craft production and sea-related activities, the relationship of the sea with the residential environment and the forms of human interaction with craft/industrial space.
- Underwater antiquities (shipwrecks, harbors, sunken antiquities, prehistoric continental shelf). Management and promotion of underwater cultural resources (the conditions for the development of the sea front, alternative underwater tours, museums of underwater antiquities etc). 'Internal' aquatic landscapes (rivers and lakes) may be included in this section.
- Ports as cosmopolitan centres of coexistence and tolerance in diversity and hybridity.
- Migrants and indigenous: the historical background of their relations from prehistory until today.
- 'Insularity': islands as intermediate and transitional zones, not only literally but also metaphorically (stability of terrestrial ground versus the instability of the sea horizon's infinity).
- Issues of shipbuilding and navigation.

On 15 May 2019 abstracts (250 words in English) are due for a conference and edited book entitled **European Islands Between Isolated and Interconnected Life Worlds: Interdisciplinary Long-Term Perspectives**, to be held at the University of Tübingen on 15-16 November 2019. Further information is available at https://www.academia.edu/38311244/Call_for_Papers_-_European_Islands_Between_Isolated_and_Interconnected_Life_Worlds_Interdisciplinary_Long-Term_Perspectives_Germany_Nov._15-16_2019_. Thematic questions include:

- Are island residents more attuned to climate change because of their dependence on its control?
- How are islands different from other isolated locations (e.g. desert communities)?
- Which social and societal practices are unique to small islands (<10,000 km²) vs. larger islands?
- What is the role of islands in processes of globalization?
- How do islands cope with adversity through their religious beliefs, technological outlays, regulations, and social norms? Can these practices be seen as a (cultural) resource for the islanders?
- How do we distinguish different types of identities between archipelagos and islands?

- Does the distance to the mainland play a role in island historical development? Can differences be traced between geographical regions?
