- Sicily and its extra-island relations.

On 15 March 2022 abstracts (ca. 500 words) are due for an interdisciplinary, cross-cultural zoom colloquium entitled **Terracottas in Motion**, to be held under the auspices of The Association for Coroplastic Studies on 20 October 2022. Further information is available at

https://m.facebook.com/story.php?story_fbid=2969113463403682&id=1520393088275734; abstracts should be sent to Maya Muratov (mmuratov@adelphi.edu) and Jaimee Uhlenbrock (uhlenbrj@hawkmail.newpaltz.edu). Potential contributions should explore any of the following multiple facets of the concept of terracottas in motion:

- Terracottas and travel:
 - This can be manifested/documented through shipwrecks containing terracottas, or through the finds of terracottas on the sea floor;
 - Appearances of terracottas (in bulk or of specific types) in networks distant from their centers of production; their spatial distribution;
 - Representations of travel in terracotta imagery by models of carts, horse riders, boats, etc.;
 - Evidence for the travel of molds for terracotta sculpture from one production center to another;
 - Evidence for the travel, or transfer, of motifs across regions or wider geographic areas;
- Short-distance movement via commercial activity, as documented by possible shop or warehouse contexts, to which terracottas were moved from production sites;
- Movement in terracottas as reflective of ritual activity that illustrates specific placement of terracottas by the user; ritual carrying, ritual breakage, ritual deposition, etc.;
- Terracotta representations implying movement from one place to the other, such as in imagery that depicts carrying or offering;
- Movement present in iconographic choices, such as in representations of walking, running, dancing, game playing, etc., and riding of all kinds, on horses, dolphins, lions, swans, bulls, war elephants, mythical beasts, etc.;
- Interpretations of movement, such as is suggested by models of feet, boots, or shoes;
- Movement as implied by gestures;
- Interactive terracottas that in whole or in part were moved by the hand of a user;
- Terracottas designed actively to move in space on their own, such as those that were suspended.

On 18 March 2022 abstracts (250 words) are due for a Student-Doctorate Archaeological Scientific Conference entitled **Artefakt**, to be hosted by the Department of Archeology at the University of Warsaw on 21-22 May 2022, planned in hybrid format pandemic permitting. Further information is available at <https://www.facebook.com/Studencko-Doktoranska-Archeologiczna-Konferencja-Naukowa-Artefakt-109009785011988>.

On 30 March 2022 offers of papers, posters, and workshops, and provisional requests to participate are due for an international symposium entitled **Prehistoric, Ancient and Medieval Medicine: New Perspectives and Challenges for the Twenty First Century**, to be held at Institute for History of Medicine and Foreign Languages, First Faculty of Medicine,

Charles University, Prague, Czech Republic on 21-24 September 2022. Further information is available from Prof. Assoc. Tomas Alusik at alusikt@gmail.com, to whom offers should also be sent. Papers presented at the conference can address, but are not limited, to the following topics:

- Methodologies and techniques, theoretical viewpoints, as well as applications of new scientific methods as applied to the research;
- The evidence for the practice of medicine, such as medical interventions, surgery and remedies;
- The challenges in the recognition of medicine in the archaeological record;
- The preventive aspects of the use of medicine, such as the care of the sick or personal hygiene and their identification in the archaeological record;
- The social and religious aspects of healing;
- Healers and practitioners;
- Healing places;
- The state of health of the populations in the periods in question;

COMMUNICATIONS

Announcements

All past issues of *Nestor* from Emmett Bennett's first newsletter in February 1957 through the present are now available on the *Nestor* website at <https://classics.uc.edu/nestor/pages/issues>. They have attracted some interest for research in the history of the study of Aegean prehistory and especially Linear B because *Nestor* provided a forum for discussion of controversial issues in the era before email list-serves and social media. I thank assistant editors Nora J. Madrigal and Charlie J. Kocurek for formatting the past issues to make them available.
