Further information and the link to submit abstracts is available at <https://classics.fas.harvard.edu/news/call-papers-2023-graduate-student-conference>. Suggested themes can include, but are not limited to:

- Diversity – How has the field fared in diversifying its participants at the undergraduate, graduate, and faculty levels? This can include topics of gender, class, race and any other background. Have we succeeded in teaching and researching more diverse subjects that better account for ancient realities? What remains to be done?
- Definitions – How do we define our field of study? What is its geography, chronology, and cultural scope? What subjects should we include, and what theories and methods should be used? How do we fit into current academic and university structures? Why does US academia not have Archaeology departments anymore? What are the consequences of this departmental division and what can we do about it? What do we have in common with other fields, and what is unique about our own?
- Relationships – How do we relate to non-academic structures, especially State-run or commercial (i.e., rescue or preventative) archaeology? What role do foreign schools and institutions serve in forming these relationships? How do we engage responsibly with local communities in the places where we conduct fieldwork?
- Historiography – How have the last two centuries (or more) of archaeological practice shaped the modern field, and should they be maintained or discarded? Have we done enough to examine and change the colonial foundations of the discipline? What can we do better?
- Responsibilities – How do we communicate the significance of our field to the public, both at home and abroad? What role does public archaeology play in our field? How has pedagogy changed, and how might it change further? What role do museums and archaeological parks play in our public relationships? How should items and exhibits be displayed?
- Narratives – How has our field shaped knowledge of the past? Are current practices changing narratives? What existing narratives remain to be challenged?

On 21 February 2023 abstracts are due for the **14th International Council for Archaeozoology Conference (ICAZ 2023): Oceans and Coastline – Past, Present and Future**, to be held on 7-12 August 2023 in Cairns, Australia. ### Announcement

#### A New Home for the Archives of the Program in Aegean Scripts and Prehistory

The Department of Classics at the University of Cincinnati is pleased to announce the acquisition of the Archives of the Program in Aegean Scripts and Prehistory (PASP). Founded by Thomas G. Palaima in 1986, the PASP Archives contain the original papers and collections of the scholars who contributed to the decipherment of Linear B: Alice E. Kober, Michael G. F. Ventris, and Emmett L. Bennett, Jr.; many of these papers are accessible online. In addition, PASP houses an extensive collection of 1:1 scale photographs of inscriptions, particularly those of the Linear A and the Linear B systems, as well as thousands of rare offprints on scripts-based subjects.

The PASP collections, both physical and digital, will be formally transferred to UC Classics in the summer of 2024. During this transition phase from late spring through early fall of that year, every effort will be made to fulfill requests for information, but significant delays will occur. We expect to open access to the physical holdings by late fall of 2024, with access to the digital holdings soon afterwards.

More information about UC Classics may be found at <https://classics.uc.edu/>, with information about the Archives and Special Collections of the Department of Classics at UC at <https://classics.uc.edu/departments/classics/archives>. More information about PASP may be found at <https://sites.utexas.edu/scripts/>.

### Grants and Fellowships

On 31 March 2023 applications from young researchers are due for the second year of the **Petros D. Goneos Memorial Award for Studies on the Culture of the Cyclades** (\$5000) for the academic year 2023-2024; on 14 April 2023 letters of recommendation are due. Further information is available at <https://cycladic.gr/en/page/chrimatiko-epathlo-stimimi-petrou-d-goneou>. The Goneos award seeks to encourage, support, and promote high quality research from new researchers who focus on topics related to the culture of the Cyclades from the Neolithic up to the post-Byzantine period or its perception to the modern times, approached through disciplines as archaeology, anthropology, and art history, as well as natural and physical sciences. Innovative and pioneering approaches, collaborative,

interdisciplinary projects, and the use and development of information technologies are encouraged. Applications should:

- Outline clearly and in detail how this award will enable the proposed research and lead to its completion.
- Demonstrate how the outcomes of the project are expected to contribute to the field by filling research gaps and promoting further research.
- Demonstrate the capability of the researcher/s to achieve the proposed outcomes. This can be proven through past academic achievements, prior publications, and reference letters.

### Calls for Papers

On 2 January 2024 abstracts (200 words) are due for a workshop entitled **Lidar and Landscapes in the Archaeology of Greece**, to take place on 15 March 2024 at the American School of Classical Studies. Abstracts should be sent to Alex Knodell at [aknodell@carleton.edu](mailto:aknodell@carleton.edu). Archaeologists working with lidar in Greece are invited to discuss recent and ongoing projects, with a particular focus on research goals and methodologies. The following themes are suggested for consideration:

- Problems and potential for lidar applications in Greece versus other parts of the world
- Techniques for processing or visualizing point clouds and various types of derivative rasters
- Archaeological and environmental spatial analysis
- Feature identification and classification
- Machine learning
- Ground-truthing, verification, and error detection

- Comparison with other remote sensing techniques
- Issues of scale—site, landscape, and regional applications
- Lidar as an archaeological tool versus a remote sensing research topic in its own right
- Interdisciplinary collaboration

On 4 January 2024 abstracts (250 words) are due for papers, roundtables, panels, or other formats at the **10th UCLA Cotsen Institute of Archaeology Graduate Student Association of Archaeology (GSAA) Conference. On 15 January 2024 abstracts (500 words in Greek, French, English, or German) are due for the second workshop on **Women in the Archaeology of Greece: Tribute to Veronika Mitsopoulos-Leon**, with a focus on women and archaeological institutions, to take place on 13 March 2024 at the Austrian Archaeological Institute in Athens, co-organized by the École française d'Athènes. Further information is available at <https://www.efa.gr/appel-a-communications-atelier-femmes-et-institutions-archeologiques/>. The 2024 workshop aims to explore different aspects of the institutional obstacles and opportunities encountered by women, in particular:

- The official or unofficial reluctance towards women on the part of foreign institutes and Greek universities, Archaeological Services, museums, and research centers
- The role of these institutions as springboards or, on the contrary, brakes in the career of women archaeologists, for instance in terms of funding opportunities
- The strategies adopted by women to pursue their career goals

On 15 January 2024 abstracts (500 words) are due for the **4th Perspectives on Balkan Archaeology (PEBA 4). The Things of Life: Resources and Religion in the Metal Ages in Southeastern Europe**, to be held on 25–28 September 2024 in Varna. - Power and Landscape: How is the emergence of power related to access to and control

over different types of materials and resources?

- Sustainability and exploitation: How was sustainability used to manage resources effectively? Which consequences had exploitation of resources?
- Production, Trade, Exchange, and Competition: How did economic developments, new technologies in extracting and producing various materials, and expanded trade networks facilitate societies' access to resources from more distant places?
- What role did animal and plant resources play in communities? What was the symbolic significance of certain animals and plants in societies (in terms of archaeozoology/archaeobotany and animals/plants in funerary contexts, deposits, or pictorial representations)?
