COMMUNICATIONS

From the Editors

Nestor is celebrating! On its 36th birthday (February 20, 1993) *Nestor* received a wonderful birthday present from the **Institute for Aegean Prehistory**--a grant that will enable us, at last, to undertake the conversion of our entire 29,000-entry bibliography into a computer data base suitable for rapid and effective search by any word or string of characters. We will make the data available to interested scholars and institutions around the world, customized for PC or Macintosh users, at the cost of distribution, which we expect to be substantially less than hard copy of back issues. The *Nestor* data base will immensely facilitate bibliographic searches in Aegean prehistory.

We plan to begin work in September with the most recent volumes and work back through 1957 as quickly as possible. The first six to eight annual volumes of *Nestor* on diskette should be available for distribution by December 1993. The present and future *Nestor* staff acknowledge, with deep gratitude, the instrumental inspiration and assistance of last year's editor Michael Fotiadis, in putting together the successful plan for the INSTAP data base proposal.

The monthly publication of *Nestor* will, of course, continue as before. At the end of each year, the current volume will also become available as a data base on diskette. We will keep you posted on our progress, and as always, welcome your suggestions and comments, especially by e-mail.

Announcement

Stefan Hiller and Fritz Blakolmer would like to announce their project of an "Annotated List of the Bronze Age Wall Paintings of Crete." This will consist of a systematic catalogue of all published Minoan wall paintings. It is also planned to make available the most important information on the material contained in the archaeological literature. The project, recently begun, will include all data referring to the objects, such as descriptions, find circumstances, the history of research, and extensive bibliographical notes. The aim of the project will be an easily usable catalogue of Minoan mural paintings for both specialists and others. Inquiries may be directed to Fritz Blakolmer, Institut für Klassische Archäologie der Universität Wien, Franz Klein-Gasse 1, 1190 Vienna, Austria.

Dissertation in Progress

Nicolle Hirschfeld, graduate student in the Department of Classics, at the University of Texas at Austin, under the direction of Tom Palaima, Cynthia Shelmerdine, and John Bennet is preparing her dissertation: A study of the various potmarking systems on late Mycenaean pottery, concentrating especially on the single painted signs. Substantial attention is also being given to incised marks on Late Bronze Age pottery, including Mycenaean and Cypriot pottery as well as "Canaanite" amphorae.

Erratum

A. Bernard Knapp brings to our attention that the book by Sturt W. Manning, *Nestor* 19:9 (\$920969) was announced prematurely. It will appear this year, as the first volume in the series *Monographs in Mediterranean Archaeology*.
