Archaeological News in Brief

Gisela Walberg and Michael Baumann report from the excavations on the Lower Terraces at Midea the find of a partially preserved Tan Ware bowl which is clearly an import from western Anatolia, most likely from Troy. The bowl, which has a characteristic rim shape and surface treatment was found in stratum 3, a LH IIIC floor layer, west of the megaron-complex and just below the line of the northern megaron wall. A few fragments of Gray Ware from Western Anatolia have also been identified by Baumann among the finds from the 1994-1997 excavations in the same area at Midea.
